

Category:Microbiology

Pages in category "Microbiology"

The following 200 pages are in this category, out of 312 total.

(previous page) (next page)

A

- Acinetobacter calcoaceticus
- Actinobacillus
- Actinomyces
- Actinomyces israeli
- Actinomycosis
- Acute pharyngitis
- Acute viral encephalitis
- Adenoviruses
- Aeromonas and plesiomonas
- Aflatoxin
- Agents of cardiovascular infections
- Agents of Eye Infections
- Agents of Female Genital Infections
- Agents of respiratory infections
- AIDS
- AIDS diagnosis
- Allergic bronchopulmonary aspergillosis
- Amikacin
- Angina fever
- Anthropozoonosis
- Antibiotics (neonatology)
- Antifungals
- Antistaphylococcal antibiotics and chemotherapeutics
- Archaea
- Aspergillus
- Aspergillus infections
- Atlas of microbiological cultures
- Atypical mycobacteria
- Atypical mycobacterias
- Atypical pneumonia

B

- Babesiosis
- Bacillus
- Bacitracin
- Bacitracin Susceptibility Test
- Bacitracin test
- Bacteria
- Bacterial Gastroenteritis
- Bacterial meningitis (infection)
- Bacterial meningitis (paediatrics)
- Bacterial reproduction
- Bacterial Spores
- Bacterial structure
- Bacterial toxins
- Bacterial vaginosis
- Bacterial virulence factors
- Bactericide
- Bacteriophage
- Bacteroides
- Bartonella henselae
- Beta lactam antibiotics
- Beta-lactam antibiotics
- Beta-lactamases
- Bifidobacterium
- Biochemistry of viruses
- Biological weapons
- Blood agar
- Blood culture
- Bordetella pertussis

- *Bordetella pertussis*
- *Borrelia burgdorferi*
- Botulism (*C. Botulinum*)
- Breakdown of vaccination in the Czech Republic

C

- Campylobacter Enteritis
- Carbapenems
- Cat-scratch disease
- Catalase test
- Causes of Bone and Joint Infections
- Cell
- Cell nucleus
- Chickenpox
- Chocolate Agar
- Ciklopirox
- Clostridium
- Colonization
- Common cold
- Congenital syphilis
- Conjugation
- Coronaviruses
- *Corynebacterium*
- *Corynebacterium diphtheriae*
- Covid-19
- *Coxiella burnetii*
- *Cryptococcus neoformans*
- Culture media

D

- Decision-making mechanism for the destruction of non-functional proteins
- Dengue fever
- Dermatomycoses
- Dermatomycosis
- Dermatophytosis
- Development of colonization of the oral cavity by bacteria
- Diagnosis of *Helicobacter Pylori* Infection
- Diarrheal diseases (guide)
- Diarrheal diseases (signpost)
- Differential diagnosis of diarrheal diseases
- Differential diagnosis of diarrhoeal diseases
- Dimorphic fungi
- Diphtheria
- Dirofilariasis
- Disinfection and sterilization
- Division of vaccination in the Czech Republic

E

- E-test
- Early infections
- Echinococcosis
- Echinoviruses
- Echovirus
- Ehrlichiosis
- Elimination of infection
- Endotoxin
- *Entamoeba histolytica*
- Enterobacter
- Enterobiasis
- Enterococcus
- Enterohemorrhagic *Escherichia coli*
- ENTEROtest
- Enterotoxigenesis
- Enterotoxins
- Enterovirus
- Eradication of disease
- Erysipela
- Erysipelas
- Erysipeloid
- *Erysipelothrix rhusiopathiae*
- *Escherichia coli*

F

- Filaria
- Flavivirus
- Francisella tularensis
- Fusobacterium

G

- Gastrointestinal parasitosis
- General characteristics of parasites
- Genital herpes
- German measles
- Giardia lamblia
- Giemsa stain
- Gingivo-periodontal manifestations in viral diseases
- Glycopeptides
- Glycosylation-independent targeting
- Glycylcycline
- Glycylcyclines
- Glycylcyclins
- Gram staining
- Gram-negative anaerobic rods and cocci
- Gram-positive non-sporulating anaerobes
- Griffith's experiment
- Group A streptococcal infection

H

- HACEK group bacteria
- HACEK organisms
- Hand disinfection cultivation test
- Hand, foot, mouth syndrome
- Hepatite A
- Hepatitis A
- Hepatitis B
- Hepatitis C
- HHV-6 and HHV-7 infections
- HIV
- Human herpesvirus 8
- Hymenolepis nana

I

- Immune defense against intracellular bacteria and fungi
- Impetigo infection
- Importance and structure of the prokaryotic chromosomes
- In vitro cultivation
- Incubation period
- Infection
- Infection threatening the fetus
- Infections caused by enterococci
- Infections caused by HHV-6 and HHV-7
- Infections caused by Streptococcus agalactiae
- Infectious brain disease
- Infectious mononucleosis
- Infectious mononucleosis syndrome
- Influenza Virus
- Inoculum
- Ixodes ricinus

J

- Japanese encephalitis

K

- Kingella
- Klebsiella

L

- Liver involvement in infectious diseases
- Low repetitive sequences

M

- Meaning and structure of prokaryotic chromosomes
- Measles
- Measurement of bacterial growth
- Microbial picture of the vagina
- Portal:Microbiological Culture Atlas
- Portal:Microbiology
- Disease elimination
- Microbiology Practicals (1. LF UK, VL)
- Microorganisms in food
- Monobactams
- Moraxella
- Moraxella catarrhalis
- MRSA
- Multi-drug resistance
- Mycobacterium tuberculosis
- Mycoplasma
- Mycosis
- Mycotoxicosis

N

- Necrotizing fasciitis
- Neisseria gonorrhoeae
- Neisseria meningitidis
- Neomycin
- Nitrofurantoin
- Nitroimidazole antibiotics
