

# Category:Pharmacology

## Pages in category "Pharmacology"

The following 200 pages are in this category, out of 247 total.

(previous page) (next page)

### A

- A drug affecting uterine activity
- Acetylsalicylic acid
- Addictive substances
- Alcohol intoxication
- Amikacin
- Amphetamines
- Amphipathic character of the molecules
- An incretin analog
- Androgens and antiandrogens (Pharmacology)
- Angiotensin II receptor blockers
- Antacids
- Antibiotics
- Antibiotics (neonatology)
- Anticancer therapy
- Antidepressant intoxication
- Antidotes in intoxications
- Antifibrinolytics
- Antifungals
- Antihistamines
- Antihypertensives
- Antiparkinson drugs
- Antiphlogistics
- Antiplatelet medications
- Antipsychotics
- Antipsychotics (pediatrics)
- Antipyretics
- Antispasmodics
- Antistaphylococcal antibiotics and chemotherapeutics
- Antithrombotics
- Antitumor therapy
- Antitussives
- Antivirals
- Asthma bronchiale therapy

### B

- Barbiturates
- Basic pharmacokinetic parameters affecting steady-state drug levels
- Benzodiazepine intoxication
- Benzodiazepines
- Beta lactam antibiotics
- Beta-blockers
- Beta-lactam antibiotics
- Beta-lactamase inhibitors
- Biotransformation
- Breakthrough pain
- Buprenorphine
- Bupropion

### C

- Carbapenems
- Carbetocin
- Cardiac inhibitors
- Cardioinhibitors
- Cardiotonics
- Catecholamines
- Cell signalling
- Characteristics of pharmacotherapy in old age
- Cholinesterase

- Ciklopirox
- Classification of drugs
- Clinical drug trials
- Clozapine
- Cocaine
- Codeine (addiction)
- Codeine (addictology)
- Combination of NSAID
- Compartments
- Cyclophosphamide
- Cytochrome P450
- Cytostatics

## D

- Diabetes treatment
- Direct parasympathomimetics
- Direct vasodilation
- Distal diuretics
- Diuretics
- Dosage forms
- Drug absorption
- Drug delivery routes into the body
- Drug Interactions
- Drug penetration through membranes
- Drug-induced pulmonary fibrosis
- Drugs in pregnancy
- Drugs for gout therapy

## E

- Effect of drugs on heart rhythm
- Effects of poisons on heart rhythm
- Elimination of drugs
- Emetics
- Endothelin
- Enzyme inhibition
- Equianalgesic doses of opioids
- Eradication of *Helicobacter pylori*
- *Escherichia coli*
- Expectorans
- Expectoration
- Ezetimibe

## F

- Fibrinolytic system
- First-pass effect
- Fomepizole

## G

- Gastroduodenal ulcer disease
- General anesthesia
- General anesthetics (pharmacology)
- Gestagens
- Glucocorticoids structure
- Glycopeptides
- Glycylcycline
- Glycylcyclines
- Glycylcyclins

## H

- Hallucinogens
- Hemostatics
- Heparin
- Hepatoprotective
- Hepatoprotectors
- Histamine
- Hormonal contraception
- Hormonal contraception
- Hormonal contraceptives
- Hydrogen peroxide
- Hydroxychloroquine

- Hypnotics

## I

- Ibuprofen
- Immunomodulators
- Indirect parasympathomimetics
- Inhalation anaesthesia
- Inhalation Anesthesia
- Inhaled  $\beta_2$ -agonist with long-term effect
- Inhibition of enzymes
- Inhibitors (genetics)
- Interstitial lung processes
- Intoxication with chlorinated hydrocarbons and benzene
- Intoxication with local anesthetics
- Intravenous anesthetics (pediatrics)
- Introduction to Pharmacology/High School (Nurse)
- Ion exchangers
- Isoprenaline

## K

- Kalium-sparing diuretics

## L

- Laxatives
- Lidocaine
- Lithium (pharmacology)
- Local anesthetics (pharmacology)
- Loop diuretics
- Low-molecular-weight heparins

## M

- Malignant neuroleptic syndrome
- Mesylate dihydroergotoxinia
- Metadon
- Methamphetamine
- Methotrexate
- Methylphenidate
- Methylprednisone
- Metoprolol
- Migraine (pathophysiology)
- Mirtazapine
- Modern antihistamine for allergic manifestations
- Monitoring drug levels
- Monobactams
- Morphine intoxication
- MTOR a inhibitory mTOR
- Multi-drug resistance

## N

- Neomycin
- Neurotransmitter
- Talk:Nicotine
- Nicotine
- Nicotine Replacement Therapy
- Nitrofurantoin
- Nitroimidazole antibiotics
- Non-opioid analgesics
- Nystatin

## O

- Ointment with 5% boric acid
- Opioid abuse
- Opioid analgesic in drops
- Opioid analgesics
- Opioids (pediatrics)
- Oral antidiabetics
- Osmotic diuretic
- Overview of established pharmaceutical drugs

- Oxazolidinones
- Oxygen therapy

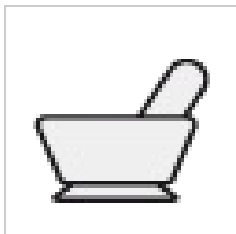

## P

- Paracetamol intoxication
- Parasympatholytics
- Pelentan
- Peptic Ulcer Treatment
- Peroral antidiabetics
- Pervitin
- Pharmacodynamics
- Pharmacogenetics
- Portal:Pharmacology
- Imatinib
- Pharmacotherapy in Elderly
- Pharmacotherapy of complications of diabetes
- Pharmacotherapy of Helicobacter pylori
- Phosphodiesterase III
- Phototoxicity
- Physico-chemical fundamentals of pharmacokinetics
- Physiological saline solution
- Placebo
- Principles of drug administration
- Principles of medication administration
- Principles of obesity treatment
- Progestogens
- Prostaglandin E2
- Prostaglandins
- Prostalglandin E1
- Proteasome inhibitors
- Proteasome inhibitors/2. generation
- Prothromplex
- Proximal tubule diuretic
