

Forum:Documentation

CSS styles

Here is a list of cascading style sheets (CSS) used by WikiLectures:

- MediaWiki:Common.css – general CSS used by every skin
- MediaWiki:Vector.css – style used by skin *Vector* (anyway, it is the only one skin available here...)

JavaScript

- MediaWiki:Common.js – general script started at every page
- MediaWiki:UploadForm.js – script used to change upload form when uploading a file
- MediaWiki:MenuChanges.js – script changing menus, footer and sidebar
- MediaWiki:EditControl.js – script changing behavior of the page when editing
- MediaWiki:ScrollingList.js – script scrolling list of wanted articles on the main page
- MediaWiki:EditShortcuts.js – this adds some shortcuts to the edit form
- MediaWiki:Disclaimer.js – shows disclaimer over the article text
- MediaWiki:ShowHide.js – allows hide some content of the page and expand it when clicking on "show" link
- MediaWiki:Templates.js – used for older browsers to manage template **Was checked**

Gadgets

Gadgets are available in the preferences of the logged in user, tab **Gadgets**. Here is a mantain special page: Special:Gadgets.
