

Mimic Muscles and Platysma

Mimic Muscles

All mimic muscles are innervated by the branches of the motor part of the facial nerve (Temporal , zygomatic, buccal, marginal mandibular and cervical)

Groups

- Orbital group
- Nasal group
- Oral group
- Auricular group
- Scalp group

Orbital Group

- Orbicularis oculi (marginal and palpebral parts)
- Corrugator supercilii.

Nasal Group

- Nasalis muscle (lateral and alar parts)
- Depressor septi nasi

Oral Group

- Orbicularis oris (marginal and labial parts)
- Levator labii superioris
- Levator anguli oris
- Levator labii superioris alaeque nasi
- Depressor labii inferioris
- Depressor anguli oris
- Mentalis
- Risorius
- Zygomaticus major
- Zygomaticus minor

Auricular Group

- Anterior auricular
- Posterior auricular
- Superior auricular
